

RESTORING INCOMING WATER THROUGH ALCHEMY

The Urusak Water activation device, that is technology received by the Seer from the Pleiadians, has been implemented (in 2021-22) and is available for purchase.¹

This device can be used by anyone to create personalized healing waters that will address imbalances in the body, on all levels: Physical, Emotional, Mental, and Spiritual levels (PEMS). It will restore harmony and homeostasis, and change the cellular structure to release the unreal matrices and become a transmitter and receiver of Divine Intent. As the cells change their 'song', so life is shaped anew, as an expression of the true Self that is part of the One.

The device restores to the water, the imprint of the 'Seed of Life' as the powerful tube torus geometry that contains the creational intelligence to birth new life / new reality. The complex tube torus, as a fluid shape that capture All That Is, can access the cosmic blueprints of all life forms. In this way, it is a bridge that brings cosmic consciousness into form, and flows to all forms, their true blueprints along with the power for regeneration and evolution.

In a being of lower consciousness, the torus geometry is 'simpler' than in an awakened one, and so the healing and activation power of the water produced with the device is optimal for the person creating the water.

Yet for all who use the device, the water becomes enlivened with the living tube torus that can access the cosmic blueprints for any part of their body... Drinking this water of cosmic intelligence – truly holy water – causes every system and body part to restore its original form and evolve from there. Eventually the body will become impervious to assaults by the unreal, because the real that is sustained by the Infinite Source, supersedes the unreal.

The body is largely made up of water, and the living water flowing in the body reaches every particle within it. Much of the body is crystalline fluid structure, and many parts are actual crystals. Crystal is the device of intercommunication, and as the pure intelligent waters flow, so the body will intercommunicate healing to all parts. The body will reach accelerated healing, as healing one part will heal the whole. This inner intercommunication system is also the source of power and vitality, so with pure enlivened water, you can expect far more vitality and power to regenerate.

In the hands of those awakening as High Alchemists, the effects of the Urusak device in body are proxy for all life, and so it has the power to heal the waters of the earth, and establish intercommunication on the planet that involves all Four Kingdoms (mineral, plant, animal, and man) in perfect interconnectedness and one-mindedness (telepathy).

As the Seer was made aware that work on the Urusak Water device was underway again, and its alchemy was being studied, the Seer tuned into it all and saw clearly that the water going into the device needed support, as the water on the planet was basically dead - stripped of awareness particles, and forced to go against its original destiny. And so, a Power wheel and sigils were created to enliven the water in several ways, and get it to a level where it could be used in the Urusak Device.

The Urusak device produces healing waters for a person, that results over time, in the fully awakened song of the cells. The cellular level is the first level where our bodies are expressed to support our individuation. So break down the cell's ability to sing its unique song, and the capacity for individuation and self-sovereign being is taken away, and beings become programmable into a race of lower consciousness.

¹ From urusakwater.com.

As we know, on planet Earth, the cells have have been attacked in so many ways, through radiation, EMF pollution, 5G radiation, HAARP technology, the depletion and shredding of oxygen molecules, nano-particulates toxic to the body, unrecognizable (GMO) substances, assaults to the hormonal system, nervous system overload, and so on. And the Seer has received many tools for us to become impervious to the disruptive influences, and this too is part of leveraging the alchemy to results that cannot be matched – all toward establishing in a fluid body of light that is unassailable.

But the additional alchemical tools received by the Seer are powerful in and of themselves, and so we are making them available on their own. They are recommended for those going the extra with using the Urusak device, but they are also recommended for everyone on the planet!

This water enlivening and activation of purification of the water we drink and bathe in is very powerful. It does not achieve the personal healing and accelerated awakening power of the Urusak device, but this preparatory step has many beneficial effects, so that everybody should be implementing it. It is capable of 'enlivening' the water in a whole home or office building, and stops the depleting and deadening effects of current water.

While we make no claims about its ability to clear specific contaminants in the water, what we can say as a general observation, is the following:

The higher the vibe of the water, the less dissonant particles, whatever they may be, can remain in it, as high vibrational states are ones beyond opposition, wherein harmful nanoparticulates cannot exist. Water of a higher vibe that is restored to its multi-dimensionality as a life-giving substance of infinity, sings a song that attunes the body's systems to higher harmonics that are innate... from the original blueprint.

Water is meant to hold memory. And fully alive water holds the blueprints or codes of creation. Everything in the body - from the bile to bone to cell, organ, and venous system – forms according to blueprints held in the original created forms. To be sustained in Source and evolve in sync with cosmic evolution, the original forms must be intact in essence. Shape or forms hold memory and unlock the secrets of consciousness from its Creator. So introduce incoherence and the body parts become misshapen, and can no longer access the cosmic consciousness from which they emerged. Similarly, introduce chaotic elements into nature, and humanity ingests chaotic tones through food that does not resemble anything found in the original blueprints of the body. This Water Power Wheel is the first level or restoration of true memory in water, so that we are taking in substance with cosmic intelligence.

In addition, the higher the vibe, the less dense the water, and the more aware and responsive it is to intent. The alchemical tools also reoxygenate the water, and that effect is easier to notice.

But the Seer has stated that the Urusak Water device is a vibrational tool that works on frequency, light, life force, and not a purifying device. So she encourages everyone to detox known contaminants from their water with whatever filter purification devices they have found to be beneficial.

Understand that operating at a higher vibrational level, the more you maintain the higher vibration in all ways, the more powerful the results will be. In general, vibrational tools work to heal and evolve by entrainment to higher orders of reality, and a higher vibratory state absorbs and cancels out lower ones. When continually exposed to things of a higher vibration, density dissolves and there is greater clarity in thought, and elevated or more pure emotions and being states. Dissonant influences are much easier to spot, detach from, and avoid, when accustomed to vibrating at a higher harmonic state. You may be surprised at how you are turned off by certain foods, clothing, fragrances, music, media, etc, once the body is vibrating at higher levels.
