

## THE WATER ALCHEMY PROTOCOL

### Preparatory Water Enlivening Alchemy

As the Seer was made aware that work on the Urusak Water device was underway again, and its alchemy was being studied, the Seer tuned into it all and saw clearly that the water going into the device needed support, as the water on the planet was basically dead - stripped of awareness particles, and forced to go against its original destiny. And so, a Power wheel and Sigils were created to enliven the water in several ways, and get it to a level where it could be used in the Urusak Water device.

The Urusak Water device produces healing waters for a person, that results over time, in the fully awakened song of the cells. The cellular level is the first level where our bodies are expressed to support our individuation. So break down the cell's ability to sing its unique song, and the capacity for individuation and self-sovereign being is taken away, and beings become programmable into a race of lower consciousness.

As we know, on planet Earth, the cells have have been attacked in so many ways, through radiation, EMF pollution, 5G radiation, HAARP technology, the depletion and shredding of oxygen molecules, nano-particulates toxic to the body, unrecognizable (GMO) substances, assaults to the hormonal system, nervous system overload, and so on. And the Seer has received many tools for us to become impervious to the disruptive influences, and this too is part of leveraging the alchemy to results that cannot be matched – all toward establishing in a fluid body of light that is unassailable.

But the additional alchemical tools received by the Seer are powerful in and of themselves, and so we are making them available on their own. They are recommended for those going the extra mile with using the Urusak Water device, but they are also recommended for everyone on the planet!

This water enlivening and activation of purification of the water we drink and bathe in is very powerful. It does not achieve the personal healing and accelerated awakening power of the Urusak Water device, but this preparatory step has many beneficial effects, so that everybody should be implementing it. It is capable of 'enlivening' the water in a whole home or office building, and stops the depleting and deadening effects of current water.

While we make no claims about its ability to clear specific contaminants in the water, what we can say as a general observation, is that the following:

The higher the vibration/frequency of the water, the less dissonant particles, whatever they may be, can remain in it, as high vibrational states are ones beyond opposition, wherein harmful nanoparticulates cannot exist. Water of a higher vibration that is restored to its multi-dimensionality as a life-giving substance of infinity, sings a song that attunes the body's systems to higher harmonics that are innate... from the original blueprint.

In addition, the higher the vibration/frequency, the less dense the water, and the more aware and responsive it is to intent. The alchemical tools also reoxygenate the water, and that effect is easier to notice.

But the Seer has stated that the Urusak Water device is a vibrational tool that works on frequency, light, life force, and not a purifying device. So she encourages everyone to detox known contaminants from their water with whatever filter purification devices they have found to be beneficial.

Understand that operating at a higher vibrational level, the more you maintain the higher vibration in all ways, the more powerful the results will be. In general, vibrational tools work to heal and evolve by entrainment to higher orders of reality, and a higher vibratory state absorbs and cancels out lower ones. When continually exposed to things of a higher vibration, density dissolves and there is greater clarity in thought, and elevated or more pure emotions and being states. Dissonant influences are much easier to spot, detach from, and avoid, when accustomed to vibrating at a higher harmonic state. You may be surprised at how you are turned off by certain foods, clothing, fragrances, music, media, etc, once the body is vibrating at higher levels.

As the products are currently offered, the preparatory Water Alchemy package is recommended to those wishing to take full advantage of the alchemical power of the Urusak. You can read about it on the separate product page, but basically, this includes placing an alchemical device on the incoming water source to a building, and using a 'coaster' alchemy for all your drinking water. It also includes the use of elite Shungite, activated through two power sigils, which clears hostile contaminants and distorted frequencies, and re-oxygenates the drinking water. Simple processes are also given with the purified water and Elite Shungite to activate and enliven the water you bathe in.

## How to prepare the water with the Urusak Water device

The water (that you will have prepared through the purification, filtering, and enlivening methods you use) is poured from a clear bottle/glass/carafe through the funnel of the Urusak Water device. This directs it through clear tubing that coils downwards in a spiral. As seen from above, the water moves in a clockwise manner.

There are twelve coils, and the water flows through six of them before it passes the point where a plate is set, with the six engraved alchemical wheels of power upon which the crystals sit. (See the documentation how to cleanse and prepare the crystals before placing them in the device.)

The first 6 coils represent the feminine through which the water is activated, and the next 6 coils are the masculine that receives the activated water.

Two other wheels of power - one above and one below, are on the bottoms of the water carafe or bottle used to pour and to receive water, respectively.

The six wheels of power on the engraved plate, are wheels placed in a clockwise manner, and they encircle the coil that passes in the middle. The point in the middle of the union of feminine and masculine aspects is a place of all possibility, where great alchemy of the One takes place, and is where the 6 wheels of power amplified by the activated crystals work their magic on the water.

Lastly, an equation of mastery is under the receiving container, and above the Wheel of Power at the receiving end. This is the equation of the four Kingdoms of the Earth, which correspond to the four chakras. **This equation activates and refines the song of the cells each time the Urusak water is created. So the person creating the alchemical Waters of Life is changed at a cellular level every time.** This is what defines "High Alchemy".

Alchemy is the art of combining components to produce leveraged outcomes that would not be possible through simple addition; and High Alchemy is when the participant or practitioner is elevated into higher consciousness through the process. In High Alchemy, the Presence of the Source of Existence is the spark that leverages outcomes, taking life into higher possibilities, through the body and life of the participant.

**Aware Water Responds to You**

Note that as you become part of the alchemy, the water moving through the alchemical device responds to you. So two people using the same device will produce different water at a vibrational level. Some people have noted subtle tastes and colored light in the water that comes through the apparatus, that is unique to a person. The water produced is resonant to your evolved consciousness, so that it supports you to a next level of expression and does not overwhelm.

That said you can use the device to make water for others nonetheless, and in this case you would set the intent for who is to receive the water or what its intended purpose is. This will be discussed in a separate document. But for everyday drinking water, the Urusak water will be created for your body's healing and activation. And as the four chakras clear the debris that blocks the flow of Divine Intent, awakening to higher truth and purpose will occur.

WATER** ©

## SIMPLE WATER CREATION CEREMONY

1. Have your bottle or carafe of clean water (as discussed in the section: *Preparatory Water Enlivening Alchemy*) sitting on the Pleiadean Power Wheel engraved on the small disk and the funnel lid.
2. Pour the water with the Power Wheel underneath the carafe into the funnel that directs it into the coiled tubing.
3. As you pour the water, call upon the Angelgods (one or both):  
***Kaaleshva-uvasetviberes-statvavi*** and ***Kaaleshva-unvasetvi-heres-statvavi*** (engraved at the front of the main plate) to assist in the alchemical process, activating the water so that it will affect the full awakening of the mastery of the song of the cells of the body.
4. Feel the alchemy taking place, where from depth of inner space's potential, the water is activated to clear the cells and bring online a new song of wholeness in them (first 6 coils of the feminine).

And as the water coils through the masculine coils and fills the receiving bottle (that sits on the Equation of the Urusak Water that is on top of the Pleiadean Power Wheel), open to receiving the new potentials for life that your cells will be calling forth through their new song.

Feel the perfection of the greater Self giving to the Self that is positioned as perspectives of reality, across inner and outer space. You giving to yourself, new potentials for a reality of great aliveness, where everything is fluidly reforming form, and imbued with awareness of your Divinity and responsive to your ever evolving Song.

With reverence, acknowledge the gift of Living Water, and imagine that as you drink it or use it however you intend to, you are doing so as a proxy, such that all the waters of the Earth are being vibrationally enhanced, vitalized, cleansed, and enlivened for all beings to be blessed by.

5. Close with gratitude.
